Professional Summary

Highly motivated Software Developer focused on creating high-performance App/Web applications. I leverage a strong foundational grasp of Data Structures and Algorithms (DSA) to architect efficient and scalable solutions.

Education

Institution	Degree/Examination	Duration	CGPA/Percentage
Jaypee University Of Engineering And Technology, Guna, MP	B.Tech (Computer Science Engineering)	July 2022 - July 2026	8.9
ST. Benedict's School, Shivpuri, MP	Higher Senior Secondary (Class XII)	April 2021 - July 2022	88.2%

Technical Skills / Coursework

- **Programming Languages:** C++, Python, JavaScript, Java
- **Web/App Development:** HTML5, CSS3, React.js (Redux), React Native, Node.js, Express.js, Tailwind CSS
- **Database Management:** MySQL, PostgreSQL, Supabase
- **Tools & Technologies:** Git, GitHub, Prisma ORM, Vercel, Prisma, Firebase
- **Coursework:** Data Structures & Algorithms,Object Oriented Programming (OOPs), Database Management Systems (DBMS)

Work Experience

Linkites Infotech Pvt. Ltd, Indore, Madhya Pradesh | *Frontend Intern* | **June 2025 - August 2025**

- Collaborated with development teams on multiple client projects, building reusable UI components
- Implemented responsive designs using React.js and React Native ensuring cross-device compatibility
- Participated in code reviews and sprint planning meetings following agile practices

Technical Projects

AI Voice Interview Platform | *Next.js, Supabase, Gemini API, VAPI Voice Agent* | **GITHUB LINK** | August 2025 - November 2025

- Developed a AI-driven voice interview platform enabling recruiters to automate candidate assessments for hiring efficiency.
- Built an interactive dashboard to create and manage interviews, leveraging Gemini API for dynamic question generation and performance analytics.
- Integrated VAPI Voice Agent for human-like candidate interactions, reducing manual interview workload.

WanderWell | *React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL* | **GITHUB LINK** | July 2024 - November 2024

- WanderWell is a full-stack travel content platform with scalable application structure to handle exploration of both famous destinations and hidden gems across India.
- Designed and implemented comprehensive city detai , providing structured data on must-visit places, top hotels, local cuisine,How to reach and historical summaries.
- Integrated RapidAPI to fetch and display real-time flight and train availability between two user-specified stations, enhancing the platform's utility.

JobifyX | *React.js, Redux Toolkit, Clerk, Tailwind CSS, Supabase* | **GITHUB LINK** | August 2025 - September 2025

- JobifyX is a full-stack job portal application with role-based access for candidates and recruiters, featuring authentication (Clerk), resume uploads (cloud storage), and real-time application tracking with status updates.
- Implemented responsive UI using ReactJS and ShadCN UI, integrated advanced form validation with React Hook Form and Zod, and enabled rich Markdown-based job descriptions for recruiters.

Achievements

LeetCode: Solved 400+ problems with a focus on DSA – **Leetcode : Priyansh7999**
HackerRank: 3-star rated in problem-solving – **Hackerrank : 221B280**
CodeChef: 2-star rated – **Codechef : priyansh799**
